## **THE SAFE USE AND BASIC MAINTENANCE OF WOODWORKING MACHINES**

### **Course length varies due to machine type**

Suitable for novices or those requiring an update on current good practice.

Contents:

The course content will vary according to the types of machine involved but will generally contain the following topics:

- Current legislation
- Hazard identification
- Setting up
- Changing cutters
- Basic maintenance
- Record keeping
- Practical assessment.

This course usually takes place in your workplace. It is essential that your machinery complies to all current legislation before training takes place.

Candidates that attend this course will be awarded a **CONTROLLED RISK** certificate of training.
